

Website Accessibility Statement

Big River Steel (Big River) recognizes the importance of ensuring our website is accessible to those with disabilities. We are committed to making our information accessible to all and are actively working to increase the usability of our website and adhere to the [Web Content Accessibility Guidelines 2.1](#) standards and guidelines.

In early 2020, we completed an audit of our website and invested in making changes to our website to make it more accessible, including but not limited to adjusted color contrast, video transcripts and appropriate tagging of content. While we continue to explore ways to improve our website, we are proud of our efforts thus far to make it more usable for all.

Big River will continue seeking solutions that bring our website up to a higher standard of website accessibility. In the meantime, if you experience any difficulty in using or navigating www.bigriversteel.com, please contact us at 870-819-3031.
